Use-Case Specification: Manage premium subscriptions

1. Use-Case Name: Manage premium subscriptions

1.1 Brief Description

This use-case describes how admins add, remove and modify premium packages (including the price, the duration of the premium account) or edit the platform's payment receiving account.

2. Flow of Events

2.1 Basic Flow

To edit premium packages:

- Admin goes to the **Premium packages** section to view all premium packages.

Premium Subscriptions

Manage packages and payment settings

< Exit

Receiving Account

ACCOUNT NUMBER

1028889953

BANK NAME

Vietcombank

ACCOUNT HOLDER

Ngo Tran Quang Dat

Change Account

Premium Packages

1 week

\$9/period

7 days subscription

1 month

\$30/period

30 days subscription

1 year

\$290/period

365 days subscription

+ Add New Package

- Admin can manage premium packages here.
 - To remove/modify package: Admin selects one package and then selects **Delete** or updates the price or account's duration.

UC Manage premium subscriptions	

- To add a new package: Admin selects **Add new package** to add a package.

3. The package is removed/added/edited.

To change platform's payment receiving account:

1. Admin goes to the **Premium packages** section.
2. Here, change the account information at **Receiving account**.
3. The system checks if the account is valid.
4. If the account is valid, the platform's payment receiving account is updated.

2.2 Alternative Flows

2.2.1 *Invalid receiving account*

This flow starts from the step 3 mentioned above (when changing platform's payment receiving account) if the account is invalid.

In this flow, the system displays the error message and requires the admin to type in another account.

3. Special Requirements

(No special requirements)

4. Preconditions

4.1 Admin account logged in

The admin must have logged in an **Admin** account.

5. Postconditions

5.1 The premium packaged is updated

The premium package is removed from the system, or is added/modified with specific cost and account's duration.
