Use-Case Specification: Upgrade to Premium

1. Use-Case Name: Upgrade to Premium

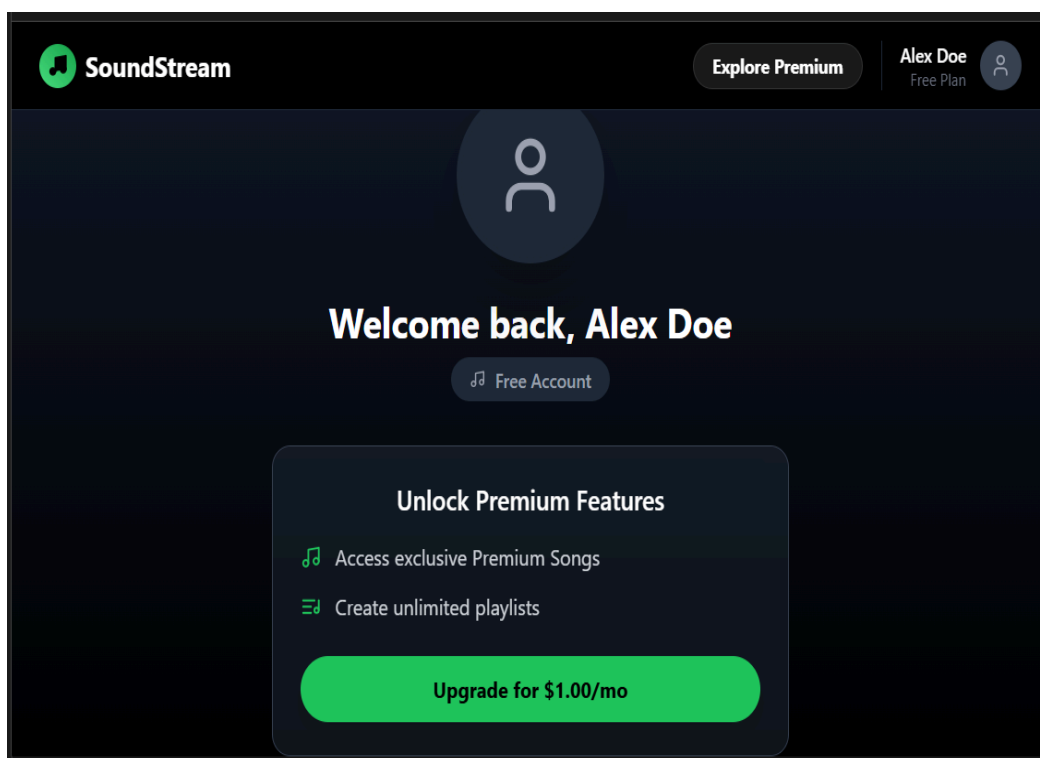

1.1 Brief Description

This use case describes the feature which lets normal users upgrade to premium users with advanced features.

2. Flow of Events

2.1 Basic Flow

1. The use case begins when the User selects the “Upgrade to Premium” option from the account menu or pricing screen.

2. The System displays the Premium Plans Page, showing:

- Available Premium plan(Monthly, Yearly)
- Prices for each plan
- Key benefits of Premium features

Melody Dive	Version: 1.0

UC Upgrade to Premium	

5. The User chooses a payment method
6. The System validates the payment information.
7. Once the data is valid, the System displays an Order Summary.
8. The User reviews the summary and clicks “Confirm & Pay.”

Premium Yearly **\$6.00**
Subscription starts immediately

Subtotal \$6.00
Tax \$0.00

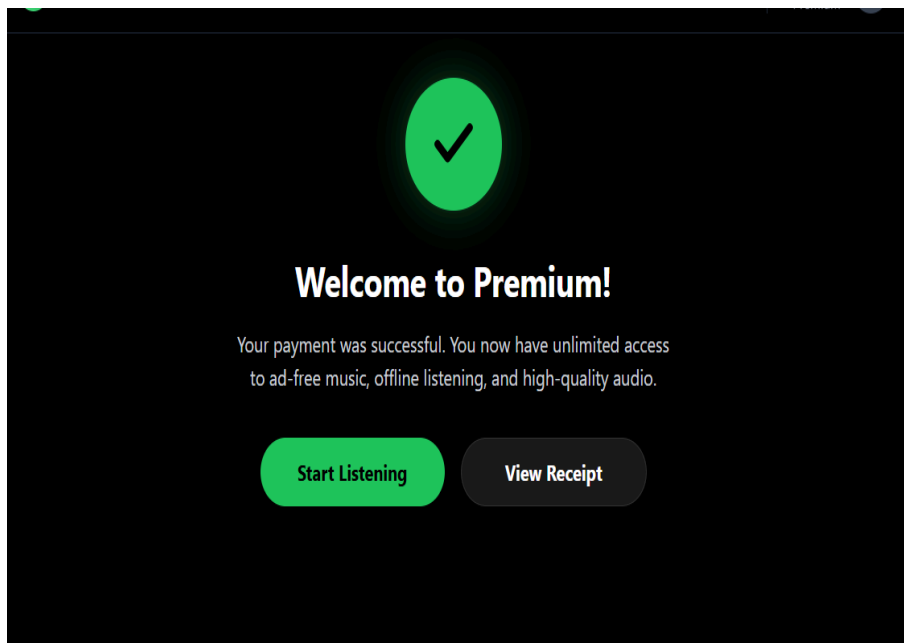

Total **\$6.00**
/year

 By clicking "Confirm & Pay", you agree to be charged \$6.00 /year automatically. You can cancel at any time in your account settings.

Confirm & Pay

9. The System sends the payment request to the Payment Gateway, including transaction amount, order ID, and payment details.
10. The Payment Gateway processes the transaction and returns a successful payment response to the System.
11. Upon receiving confirmation, the System:
 - Upgrades the User’s account status to Premium
 - Creates a new subscription record (plan, activation date, renewal cycle)
 - Logs the transaction and generates an invoice.
12. The System displays a success screen, stating that the User has been upgraded to Premium and showing shortcuts to Premium features.

UC Upgrade to Premium	

13. The use case ends when the User sees their updated Premium status and begins using Premium functionalities.

2.2 Alternative Flows

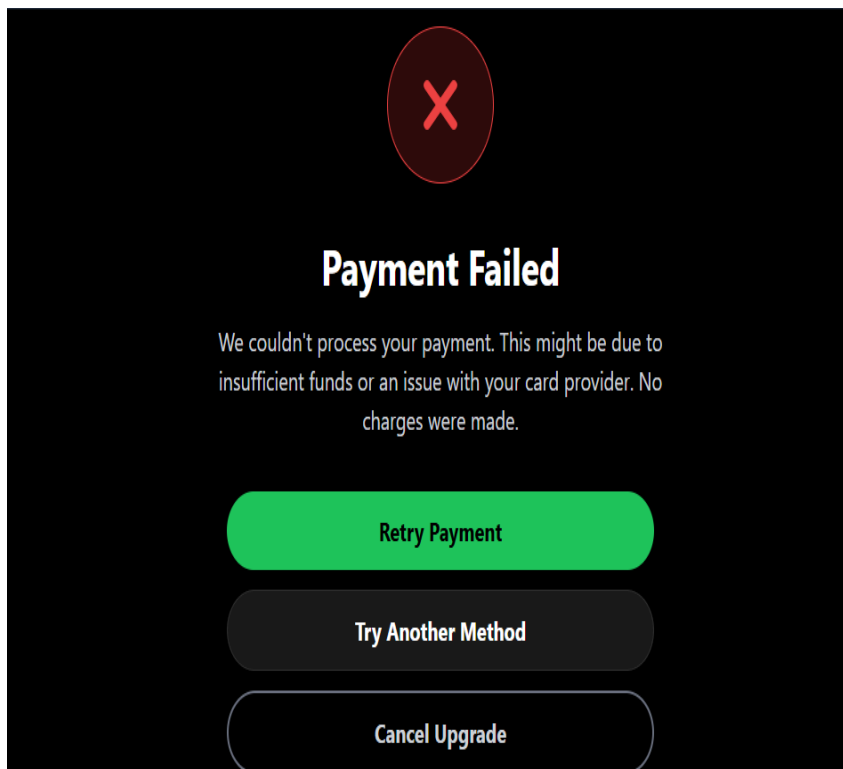

2.2.1 Payment Fails

This alternative flow branches from Basic Flow Step 10, when the Payment Gateway does not return a successful payment response.

1. Instead of sending a successful response, the Payment Gateway returns a payment failure message to the System .
2. The System records the failed payment attempt and keeps the User's account status as a normal user.
3. The System displays a Payment Failed screen to the User
4. The User chooses one of the following actions:
 - Retry with same payment method
 - Select another payment method
 - Cancel the upgrade.

If the User retries and a subsequent payment succeeds, the flow continues from Basic Flow Step 11

3. Special Requirements

3.1 Performance requirement

The Premium Plans Page must load within 2 seconds under normal server load, and payment input validation must occur in under 200 milliseconds to ensure a smooth and responsive user experience.

3.2 Reliability Requirement

The System must achieve at least **99% uptime** for the payment processing feature to ensure users can upgrade at any time.

4. Preconditions

4.1 User account logged in

The user must have logged in their account.

4.2 User must have a normal(non-premium) account

The user's current subscription status must be normal (non-premium) in order to upgrade to a Premium plan.

5. Postconditions

5.1 Account upgraded to Premium

The user's subscription status is changed from **normal** to **premium**, a new Premium subscription record is created, and the successful payment transaction is stored in the system.

UC Upgrade to Premium	

5.2 Upgrade not completed

If the payment fails or the user cancels the process, the user's subscription status remains normal (non-premium), and no new premium subscription is created.

6. Extension Points

None
