Use-Case Specification: Manage premium packages

1. Use-Case Name: Manage premium Packages

1.1 Brief Description

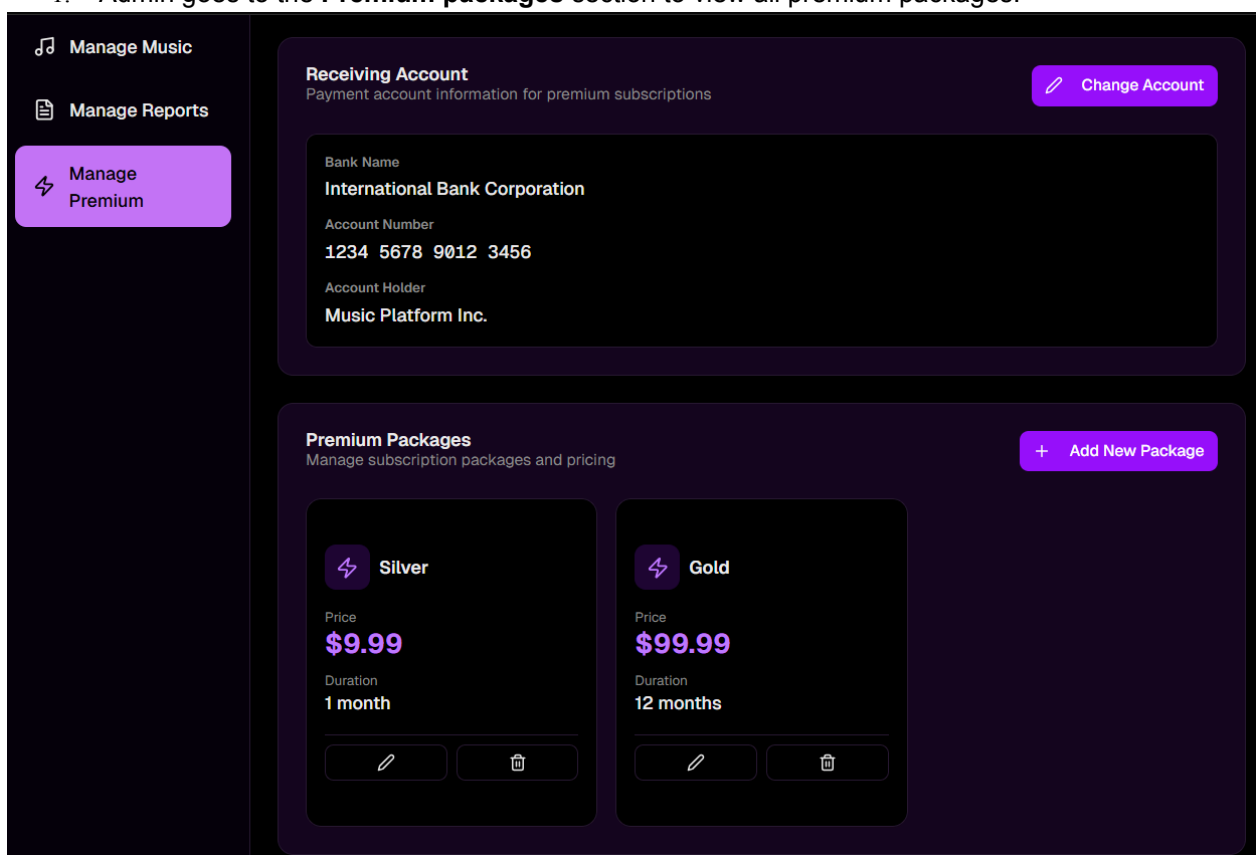

This use-case describes how admins add, remove and modify premium packages (including the price, the duration of the premium account) or edit the platform's payment receiving account.

2. Flow of Events

2.1 Basic Flow

To edit premium packages:

1. Admin goes to the **Premium packages** section to view all premium packages.

2. Admin can manage premium packages here.
 - To remove/modify package: Admin selects one package and then selects **Delete** or updates the price or account's duration.

2.2 Alternative Flows

2.2.1 *Invalid receiving account*

This flow starts from the step 3 mentioned above (when changing platform's payment receiving account) if the account is invalid.

In this flow, the system displays the error message and requires the admin to type in another account.

3. Special Requirements

(No special requirements)

4. Preconditions

4.1 Admin account logged in

The admin must have logged in an **Admin** account.

5. Postconditions

5.1 The premium packaged is updated

The premium package is removed from the system, or is added/modified with specific cost and account's duration.
