Master Test Plan

1. Introduction

1.1 Purpose

The purpose of this Master Test Plan is to provide a comprehensive overview of the testing strategy, objectives, scope, and approach for the project Melody Dive. This document defines the overall direction for testing activities to ensure the quality and reliability of the software product.

1.2 Objectives

The objectives of this document are:

- To clearly define the scope and objectives of testing.
- To establish a common understanding of the testing process among all members.
- To outline responsibilities, resources, timelines, and deliverables for testing.
- To serve as a reference guide for planning, execution, monitoring, and control of test activities.

1.3 People that need to use document

This document is intended for project managers, testers, developers who need to understand or participate in the testing process.

1.4 The key features of this document are

- A unified framework for all testing activities.
- Clear allocation of roles and responsibilities.
- Defined entry and exit criteria for testing.
- Guidelines for risk management, defect tracking, and reporting.

2. Target Test Items

2.1 Key features

Our team will thoroughly test the Melody Dive project's features to ensure they perform exactly as required.

Features	Tester
Create a playlist	Nguyen Hoang Dang
Edit a playlist	Nguyen Hoang Dang
Song Playback	Nguyen Hoang Anh Khoa
Comment a song	Huynh Gia Bao
Delete a comment	Huynh Gia Bao
Search	Ngo Tran Quang Dat
Create a song	Thai Minh Huy

2.2 Area to testing

In this section, the testing areas of the system are defined to specify which aspects will be verified during the testing process. The purpose of identifying the testing areas is to ensure that all critical functionalities are covered, providing a structured approach to achieve the project's quality objectives.

Melody Dive	Version: 1.4
Master Test Plan	Date: 21/11/2025
MD 1.4 Testing	

Testing type	Purpose	Scope	Approach
Functional testing	To verify that the software functions according to the specified requirements.	This includes testing all core functionalities above and extra functionalities	Functional test cases will be created for each feature to ensure that inputs lead to the expected outputs. Both positive and negative scenarios will be considered
Usability testing	To evaluate the user experience and ensure the application is user-friendly, intuitive and easy to navigate	Includes testing by real users or testers who will assess the ease of use, efficiency and satisfaction provided by the application (Include User Interface, ...)	Usability testing will involve observing users as they interact with the application, gathering feedback and making recommendations for improvements

3. Environmental Needs

3.1 Hardware Requirements

Requirements	Minimum Specification
Processor	Processor Intel Core I5 (or equivalent) or higher with a minimum of 2 GHz.
RAM	8GB minimum or more is recommended for better performance
Storage	At least 10GB of free space.
Display	Recommended: 1920 x 1080px

3.2 Software in the Test Environment

The following base software elements are required in the test environment for this *Test Plan*.

Software Name	Purpose	Version Recommended	Type and Other Notes
Window 11, 64 bits	For general use / development	Window 11 version 24H2	Operating System
Visual Studio Code	For development	1.92.2	Code Editor
Cursor	For development	1.4.5	Code Editor
Google Chrome	For testing	139.0.7258.129	Internet Browser
Microsoft Edge	For testing	139.0.3405.111	Internet Browser
Firefox	For testing	141.0	Internet Browser
Safari	For testing	17.6	Internet Browser

Melody Dive	Version: 1.4
Master Test Plan	Date: 21/11/2025
MD 1.4 Testing	

3.3 Productivity and Support Tools

The following tools will be employed to support the test process for this *Test Plan*.

Tool Category or Type	Tool Brand Name	Vendor or In-house	Version	Description
Version Control	Github	Github	Web-version 2025	Source code management for version tracking and team collaboration
Version Control Client	Github Desktop	Github	3.4.5	Desktop application for easier GitHub operations such as commit, push, and pull
Word Processing	Google Docs	Google	Web-version 2025	Used for writing reports, documentation, and test plans
Spreadsheet	Google Sheets	Google	Web-version 2025	Online spreadsheet tool for storing test cases, results
Project Management	Jira	Atlassian	Web-version 2025	Tool for organizing tasks and tracking test plan

4. Responsibilities, Staffing, and Training Needs

4.1 People and Roles

This table shows the staffing assumptions for the test effort.

Human Resources		
Role	Minimum Resources Recommended (number of full-time roles allocated)	Specific Responsibilities or Comments
Test Manager	Ngo Tran Quang Dat	The Test Manager is responsible for overseeing the entire testing process. Key responsibilities include: • Planning and Logistics • Mission Agreement • Motivators Identification • Resource Acquisition • Management Reporting • Advocacy for Testing • Effectiveness Evaluation

Melody Dive	Version: 1.4
Master Test Plan	Date: 21/11//2025
MD 1.4 Testing	

Human Resources		
Role	Minimum Resources Recommended (number of full-time roles allocated)	Specific Responsibilities or Comments
Tester	Nguyen Hoang Anh Khoa Huynh Gia Bao Nguyen Hoang Dang Ngo Tran Quang Dat Thai Minh Huy	Testers are responsible for implementing, executing the test plans, report bugs for developers and retest after developers fix . Key responsibilities include: • Test Implementation • Test Execution • Result Logging • Failure Analysis and Report Failure and Retest • Failure Documentation
Fix bugs developer	Nguyen Hoang Anh Khoa Huynh Gia Bao Thai Minh Huy	Developer fix bugs be report from tester, after require tester retest Key responsibilities include: • Fix Bugs • Require Tester retest
